

Jill Campbell

Executive Vice President, Chief People and Operations Officer

Cox Enterprises

Greater Atlanta Area

Education: University of Nevada, Las Vegas

Bio

Jill Campbell knows how we do things at Cox almost better than anyone. She's put her more than 37 years of experience here to good use as the chief people & operations officer for Cox Enterprises. As the leader of multiple departments and hundreds of people (yes, she stays busy) you might wonder how she could possibly focus on anything else. But Campbell has a goal to make Cox a better (the best) place to work, and she's doing it by spearheading the EXLab movement: a multi-year initiative designed to reimagine the employee experience at Cox.

As an operations aficionado, she didn't think her career path would take her to where she is today. After graduating in 1982 from the University of Nevada, Las Vegas, Campbell began her career at Cox as the director of communications in Oklahoma City. Over the years she's brought her authentic leadership to several roles in Cox Communications operations across the United States, earning an MBA from Oklahoma City along the way.

In 2001, she became the senior vice president of operations for the Eastern Division, and in 2011, she expanded her role to oversee operations for the company's entire field operations. In 2017 she was inducted into the Cable Hall of Fame (FYI: this is awesome and a big deal).

Campbell's passion for the people at Cox is strong, but she's also deeply committed to improving our communities. She's served as a board member for several nonprofit organizations including United Way, Boys & Girls Club of America and the YMCA. She also served as a member of the Woodruff Arts Center board of trustees and chairperson of the board of directors of Girl Talk.

Campbell's married with three children and two granddaughters. When she's able to take a breather, she prefers it to be underwater when she's scuba diving. And if she wasn't leading people and ops at Cox, she'd be a motivational speaker, sharing what she's learned along the way.
